

IGUNMA GOODNESS, SOFTWARE ENGINEER

Email: goodnessigunma1@gmail.com | +2348108251426 | [LinkedIn Profile](#) | Portfolio: [My-Portfolio](#)

Creative software engineer who strongly focuses on developing visually appealing and efficient web applications that drive user growth and engagement. Highly skilled in translating designs into functional code, and collaborating on solutions with the product and server-side teams to offer the best user experience and build higher customer lifetime value.

Skills

Javascript | Typescript | React Js | Redux & Redux Toolkit | Next Js | Node Js | Express | Git | Github | CSS Flexbox & Grid | Bootstrap | Tailwind | SASS/SCSS | MongoDB | GraphQL | Unit & Functional Testing

Education

University Of Benin — Oct 2016 to Jul 2021

Computer Science, *Second Class Upper (2.1)*

Experience

GEMSTONE TECHNOLOGIES

Front End Software Engineer, Lagos. (Sept 2023 - Nov 2023)

- Assisted in creating engaging user interfaces, ensuring consistency in design, layout, and functionality across different browsers and devices.
- Performed code reviews to encourage quality, reusable, and more efficient code.
- Actively participated in Agile development processes.
- Translated Figma designs and prototypes into pixel-perfect user interfaces.
- Worked with Typescript and NextJs.

INTERSWITCH GROUP

Junior Front End Engineer (Contract), Lagos. (May 2022 – April 2023)

- Applied pragmatism and best practices in software engineering, delivering tasks on time, and with excellent quality.
- Experience with Rest APIs to fetch data and manage state with Redux Toolkit.
- Actively participated in Agile development processes (SCRUM, KANBAN, JIRA), including sprint planning, daily stand-ups, and retrospectives.
- Worked on existing React codebase to add new features using functional and class-based components.
- Writing unit and functional tests with RTL (React Testing Library) and Jest, thereby continually improving the web application.

CODEZOOMERS

Software Engineer Intern, Benin City. (Aug, 2019 - Jan, 2020)

- Developed strong problem-solving abilities, troubleshooting, and debugging issues to ensure smooth website functionality.
- Developed proficiency in version control systems, such as Git, for efficient collaboration and code management.

Projects

Quickteller Homes - [Quickteller Homes Live Link](#)

Worked with a team of software engineers to develop the Quickteller Homes web application.

- Implemented the UI for the Admin Dashboard Page using React.
- Implemented the modal and carousel component (UI and Logic) using ReactJS, SASS, and React Carousel on the product listing details page.
- REST API calls to display data from endpoints.

Hubeatz - [Hubeatz Live Link](#)

Worked with a team of front end engineers to develop the Hubeatz web application with Typescript and NextJs.

- Implemented advanced filtering system for the web application
- Performed API integration to create, read, update, and delete data from endpoints, among many other tasks.

Igshop (E-Commerce Web Application) - [Igshop Live Link](#)

E-commerce web app built with React, Redux Toolkit, and Firebase. The backend server is built with Node and ExpressJS.

- This web app features stripe for payment integration
- Used React chart library for charts, react country region selector for country selection among many other tasks.

ShirtFusion 360 - [ShirtFusion 360 Live Link](#)

This project uses ThreeJS and React Three Fiber for 3D graphics, Tailwind CSS, and Framer Motion. Explore loading and customizing 3D models, camera manipulation, and object positioning.
