IGUNMA GOODNESS, SOFTWARE ENGINEER

Email: goodnessigunma1@gmail.com | +2348108251426 | **LinkedIn Profile** | Portfolio: **Igudy-portfolio**

Creative software engineer who strongly focuses on developing visually appealing and efficient web applications that drive user growth and engagement. Highly skilled in translating designs into functional code, and collaborating on solutions with the product and server-side teams to offer the best user experience and build higher customer lifetime value.

Experience

INTERSWITCH GROUP

Front End Engineer, Lagos. (May 2022 – April 2023)

- Applied pragmatism and best practices in software engineering, delivering tasks on time, and with excellent quality.
- Experience with Rest APIs to fetch data and manage state with Redux Toolkit.
- Actively participated in Agile development processes (SCRUM, KANBAN, JIRA), including sprint planning, daily stand-ups, and retrospectives.
- Worked on existing React codebase to add new features using functional and class-based components.
- Writing unit and functional tests with RTL(React Testing Library) and Jest, thereby continually improving the web application.

SYBORF BUSINESS VERNTURE

Junior Software Engineer, Benin City. (Oct 2021 - Jan 2022)

- Assisted in the creation of engaging user interfaces, ensuring consistency in design, layout, and functionality across different browsers and devices.
- Performed code reviews to encourage quality, reusable, and more efficient code.
- Translated Figma designs and prototypes into pixel-perfect user interfaces.

CODEZOOMERS

Software Engineer Intern, Benin City. (Aug, 2019 - Jan, 2020)

- Developed strong problem-solving abilities, troubleshooting and debugging issues to ensure smooth website functionality.
- Developed proficiency in version control systems, such as Git, for efficient collaboration and code management.

Skills

Javascript | Typescript | React Js | Redux & Redux Toolkit | Next Js | Node Js | Express | Git | Github | CSS Flexbox & Grid | Bootstrap | Tailwind | SASS/SCSS | Material UI | MongoDB | GraphQL | Unit & Functional Testing

Projects

Quickteller Homes – [Quickteller Homes Live Link](#)

Worked with a team of software engineers to develop the Quickteller Homes web application.

- Implemented the UI for the Admin Dashboard Page using React, Material UI, and React Bootstrap
- Implemented the modal and carousel component (UI and Logic) using ReactJS, SASS, and React Carousel on the product listing details page.
- REST API calls to display data from endpoints.

Igshop (E-Commerce Web Application) – [Igshop Live Link](#)

E-commerce web app built with React, Redux Toolkit, and Firebase (authentication and storage). The backend server is built with Node and ExpressJS. This web app features the stripe for payment integration, react chart library for admin charts, react country region selector for country selection and other features

Evogym – [Evogym Live Link](#)

This is a landing page for a gym built with React and TypeScript, with a modern design using Heroicons for icons and Framer Motion for animations. Styling is done with Tailwind, providing a clean and responsive layout.

Education

University Of Benin — *Oct 2016 to Jul 2021*

Computer Science, *Second Class Upper (2.1)*
